

TRUCK SERVICES SEARCHING ROADMAP

Truck services can be searched through two different methods.

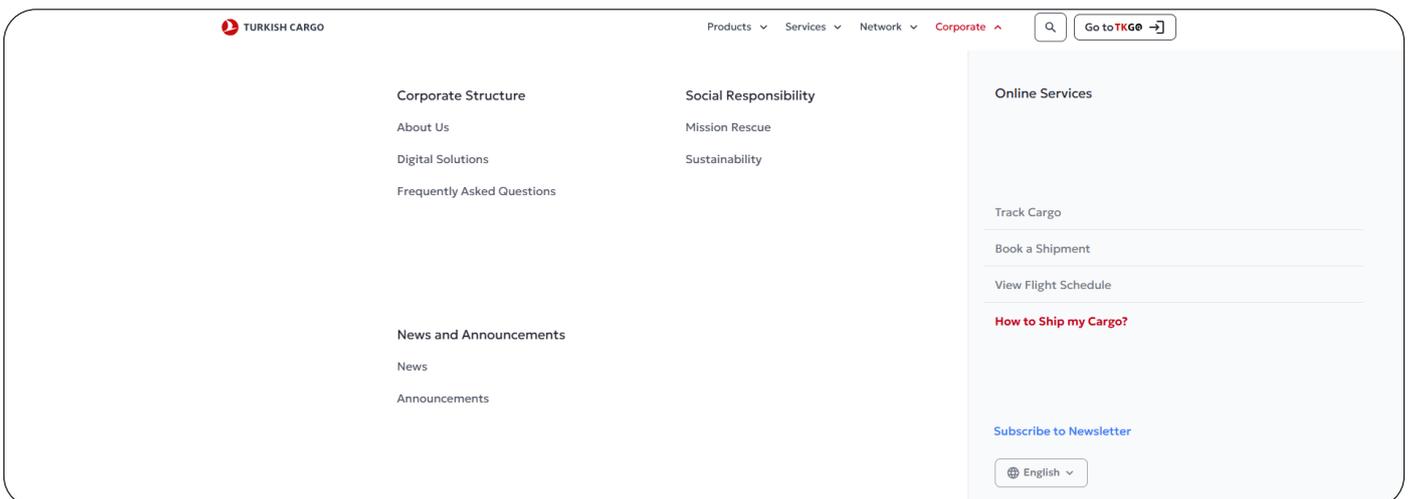

Scheduled truck services are predefined and commonly used routes available in the reservation system. These services are listed by following the search steps below. Departure times and service structures may vary depending on operational requirements.

On-request truck services can not be found through standard search steps. For these segments, a manual search should be performed using the list below. For detailed information, please contact the truck departure station. After approval from station, the truck segment is created in the reservation system with an on-request truck number.

SCHEDULE TRUCK SEARCHING STEPS

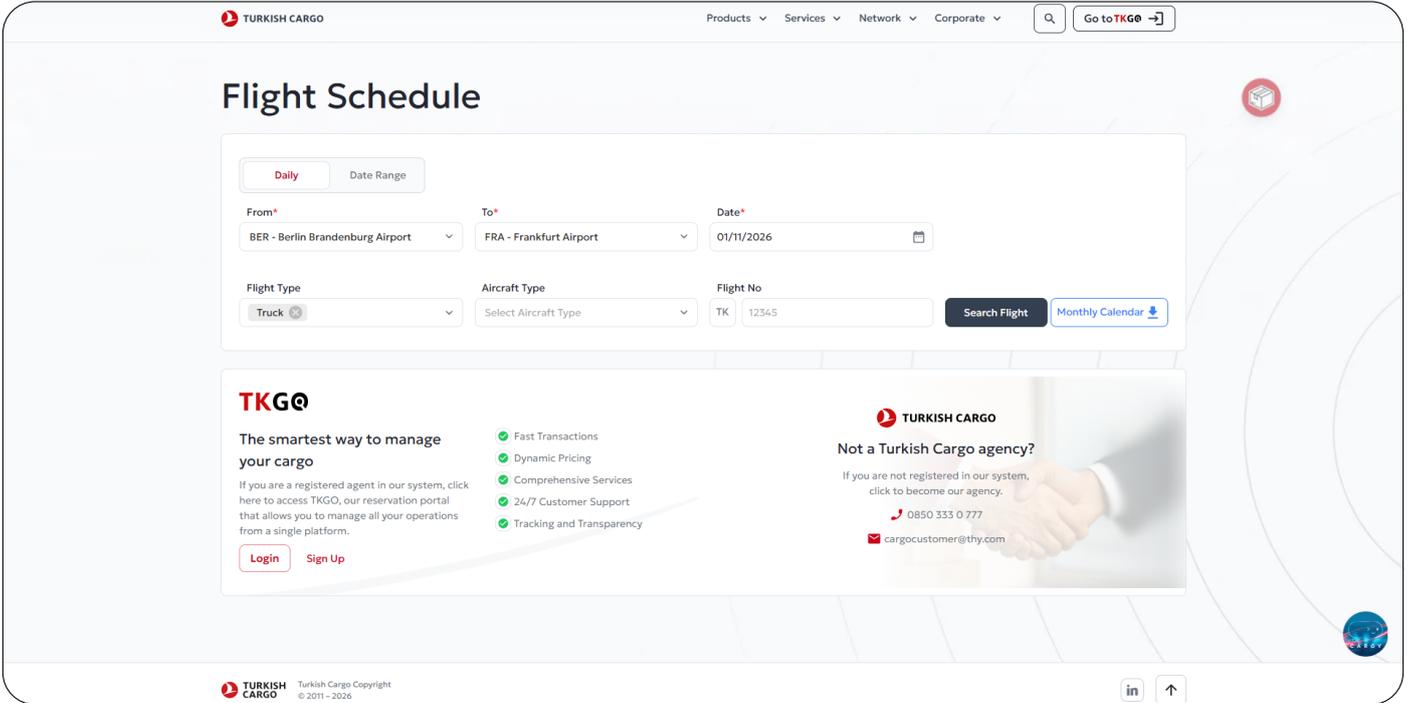

STEP.1

After logging into the Turkish Cargo website, click on the “Flight Schedule” section located under the “Online Services” section.

STEP.2

Once you have selected your departure and arrival points, you can filter the results by selecting 'Truck' as the flight type to view available truck flights.

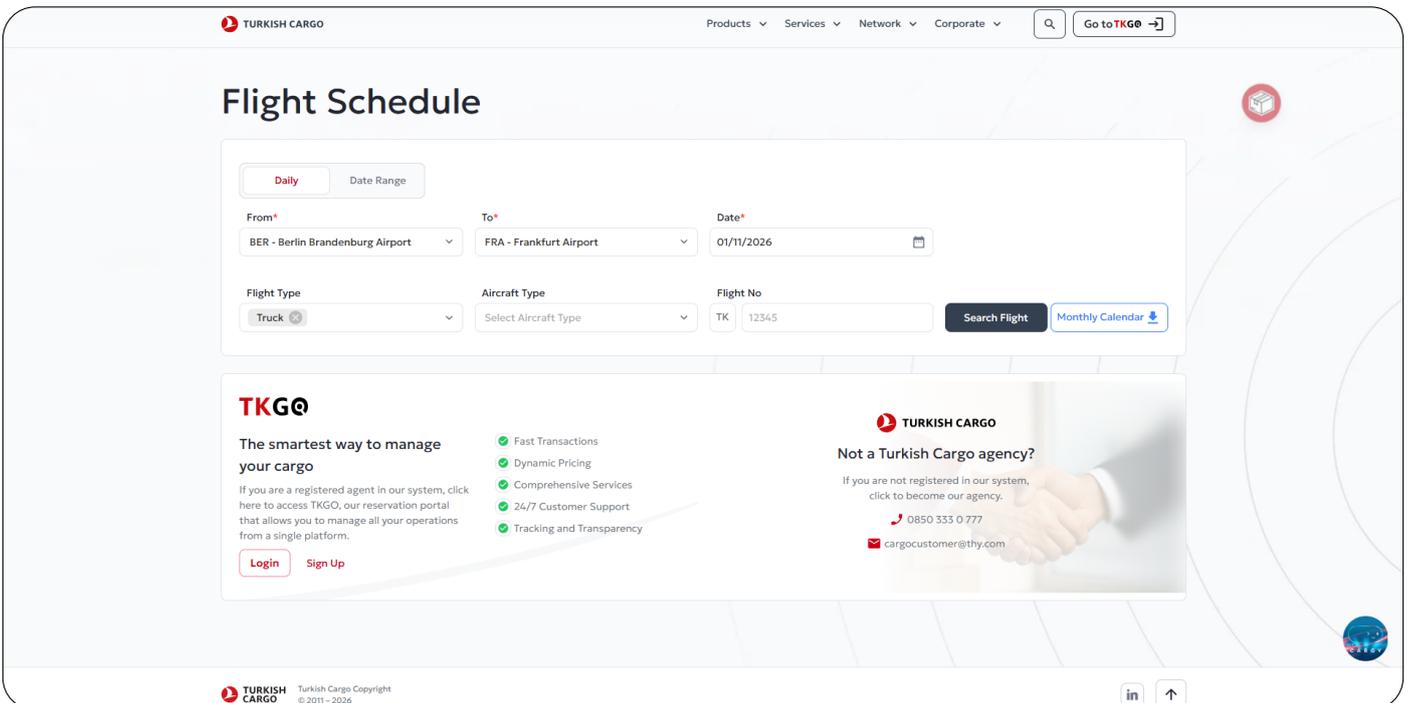

The screenshot shows the Turkish Cargo website's Flight Schedule page. The search filters are set as follows:

- From:** BER - Berlin Brandenburg Airport
- To:** FRA - Frankfurt Airport
- Date:** 01/11/2026
- Flight Type:** Truck
- Aircraft Type:** Select Aircraft Type
- Flight No:** TK 12345

Buttons for "Search Flight" and "Monthly Calendar" are visible. Below the search filters, there are two promotional banners for TKG@ and a "Not a Turkish Cargo agency?" section.

STEP.3

After completing these steps, you will be able to view detailed information regarding the listed flights.

This screenshot is identical to the one in Step 2, showing the Turkish Cargo Flight Schedule page with the same search filters: From (BER - Berlin Brandenburg Airport), To (FRA - Frankfurt Airport), Date (01/11/2026), Flight Type (Truck), Aircraft Type (Select Aircraft Type), and Flight No (TK 12345). The page layout, including the TKG@ and agency banners, remains the same.
